ARTECH HOUSE BOOK SERIES

Artech House Information Security and Privacy Series

The Artech House series on Information Security and Privacy provides technical insight into the emerging disciplines and technologies that will become the basis for the information society of tomorrow. This series covers all technical principles, technologies, methods, and applications related to information security and privacy. Following Artech's historical leadership in publishing high-level and state-of-the-art books, this series provides technical texts describing the current and forecasted technologies and trends. The emphasis of the series is technical, rather than a popular level of presentation. Artech publishes a distinctly professional level of technical book that provides details and specifics, rather than generalities without depth.

The series invites proposals for books that focus on these and other topics:

- Information security management (in particular, risk management and risk assessment)
- Cybersecurity – a general overview and introduction
- Electronic voting security
- Internet of things (IoT) and industrial control system security
- Electronic ID cards
- Security and cryptography engineering
- Supply chain security
- Network security (especially in the light of deperimeterization, virtualization, and cloud computing)
- Cryptocurrencies and distributed ledger technologies (DLTs)
- Anonymity networks (e.g., TOR)
- Leakage-resilient (i.e., side channel-resistant) cryptography
- Security hardware (e.g., HSMs, smartcards, security tokens)
- Privacy-enhancing technologies
- Records management and long-term archives

Do you have something to contribute?

To discuss book ideas or learn more about authorship, prospective authors should contact the series editor **Rolf Oppliger**, founder and owner of eSECURITY Technologies, and adjunct professor at the University of Zurich, at rolf.oppliger@esecurity.ch

Proposals may be submitted directly online at

<https://us.artechhouse.com/assets/clientpages/author-questionnaire.aspx>

Interested authors may also contact the acquisitions staff at Artech House at acquisitions@artechhouse.com
